Materials & Finish
 AGL products are cast aluminum with acrylic lenses. AGL finishes are polyester powder coating in either black, dark bronze or dark green.

Ballasts
 AGL fixtures are supplied with 120 volt ballast. 208, 240 and 277 volt ballast are an option. (-V28, -V24, -V27)

Labels
 UL Listed in U.S. and Canada for wet locations

Build a System

POLES - For a QuickShip combination, use the 14' above ground direct burial fiberglass tapered pole (F1814BZ)

MOUNTING:
 AGL fixtures utilize a slip fitter to accommodate a 3" OD pole or tendon.

LUMINAIRE BASE:
 AGL fixtures feature a standard 8" transitional base. However a large 14.5" base is available (-LB6) so as to accommodate a button photocell (-PC).
