

Box Top Vertical Shoebox

The Box Top fixture was a popular design recently because of its 360d even spread. Originally designed for centers of parking lots. Since much light is wasted on lighting the pole column, it is not used much except for large lots and outdated architects.

Materials & Finish

Housings are made with die-cast seamless aluminum and painted with the Delta Guard finish, featuring an E-coat epoxy primer and a bronze acrylic powder topcoat. This assures you that the products you install today will look great in the future as well. Includes a 7-year finish warranty!

Ballasts

All fixtures are standard with a high power factor ballast. The BT fixtures are supplied with a multi-volt ballast (120, 208, 240 and 277 volts). 480volt ballast is an option.

Labels

UL Listed in U.S. and Canada for wet locations

Build a System

POLES - Only available with 1 head per pole.

MOUNTING:

When using with Square Steel, U4, U6, R5 mounts connect directly to the pole

When using other poles the mounts connect to a tendon.
