

EET* POWER MANAGER

*50 USA & Int'l patents granted

Field-Install Kit for ... DELI DISPLAY CASES

... is a 24hour/day 'Electronic Supervisor' that protects the Display, increases machine life, decreases downtime and repairs *plus* saves energy dollars (electric watts) wasted as heat!

GENTLE ACCELERATION... reduces hard-start stress to motors, belts and clutches

“Soft Start” and “Gentle Acceleration” avoids cost ... **saves dollars!**

FAULT DIAGNOSTICS... detect higher current that causes motor-wiring heat damage

Performance “Monitoring, Diagnostics” avoids cost ... **saves dollars!**

ELECTRONIC PROTECTION... prevents machine damage by turning the motor off

Fast-acting “solid state power control” avoids cost ... **saves dollars!**

WORK-LOAD CONTROL... decreases life-shortening heat in the motors and wiring

Lowering electric watts to work demand...**saves dollars and energy!**

DELI CASE SUPERVISION

... lowers cost

... saves energy

... pays for itself !
