Lighting

LIGHTING RETROFITTING

WHERE CAN I SAVE ?

Lighting saving approaches are as diverse as lighting methods themselves. General **office fluorescents**, **recessed** lighting and **warehouse bay** lighting, are just some of the areas that are likely operating inefficiently, thereby, costing you needless dollars!

LIGHTING IN COMMERCIAL AND INDUSTRIAL BUILDINGS ACCOUNTS FOR UP TO 50% OF AMERICA'S \$75 BILLION DOLLAR LIGHTING BILL.

HOW CAN I SAVE ?

The process of converting inefficient lighting systems to better designed and more cost-effective systems is termed **lighting retrofitting**. In many cases new components are installed into your existing fixtures or completely new fixtures are utilized.

Wesworth uses many nationwide proven products including: **Sylvania Quicktronic** (T8) & **Pentronic** (T5) systems, **AEI Himax** systems, and locally developed **Quintus** fixtures.

HOW MUCH SAVINGS ?

Here are some examples:

Office 2x4 = up to 76% with reflected Quicktronic fluorescent system

Showroom 2x2 = up to 52% with AEI Himax system

Warehouse Bay Light = up to 45% with Quintus ultrabrite light system

And remember, many of these systems also offer improved lighting, greater control, better color and 24 month paybacks!

ENERGY EFFICIENT LIGHTING PRODUCTS CAN SAVE BUSINESSES AN AVERAGE OF \$.50 PER SQUARE FOOT.

LET'S BEGIN !

First, Wesworth will **audit your facility** looking for types of lights and types of usage...

Then **propose improvements** showing your savings potential...
