

Night Owl Service

Predictable verification of outdoor lighting

How it works

Once a month, a Wesworth tech visits your facility at NO COST at night and observes whether your outdoor pole lights, wallpacks and other fixtures are operating properly.

If any of your fixtures are not working, we'll inform you and automatically dispatch a tech to the repair the fixtures. If the tech discovers repairs that will exceed the pre-arranged site limit, we will contact you before proceeding.

If the tech sees no problems, we'll send out a quick confirmation of our visit and automatically return next month.

Fixtures Covered

- Pole lights
- Wallpaks & Wall washes
- Bollards & landscape lights
- Signage lights (neon excluded)
- Recessed & canopy lighting

Terms & Conditions

Monthly site visit occurs at a time and date of Wesworth's choosing
