

WESWORTH ELECTRIC'S SOLUTIONS

STANDBY HOME GENERATORS

Considering installing a generator for your house?

But shocked at the high cost?

Then consider Wesworth's Power PlanB...

HOW IT WORKS

Wesworth's Power PlanB is for home owners that want to be assured of electricity throughout a storm period, without investing in costly equipment and expensive modifications.

WHATS INCLUDED

- ▶ *Power PlanB customers receive a guaranteed reservation for a portable generator large enough to power their whole house (including A/C) delivered in the event a storm threatens.*
- ▶ *Further Wesworth pre-installs a Plug and Play interface that allows customers to seamlessly and safely activate the generator if power goes out.*

COMPARE

15,000watt Generator

- ▶ *Pull Arounds - they are too small for central A/C and still have large installation costs to be safely used. Total Cost = \$6,000 (\$3,100 equip + \$2,900 install & city fees)*

40kW Generac Unit

- ▶ *Installed Permanent Units - these are expensive to buy and expensive to install and maintain. Total Cost = \$30,000 (\$15,000 equip + \$15,000 install & city fees)*

COST BREAKDOWN

\$3395

& \$1200 annual Reservation

- ▶ *Power PlanB customers pay a one-time installation fee of \$3395 to setup a Plug and Play power inlet station at their house.*
- ▶ *Next, customers place a \$1200 non refundable annual reservation to guarantee a generator for the storm season.*
- ▶ *Then if a storm threatens, a generator is delivered to the site, hooked up and ready to be activated by the Plug and Play interface.*
- ▶ *Customer keeps the generator as long as needed and pays only the weekly generator rental cost of \$1100/wk plus fuel and some misc charges*
